## FIREBOX® III FIREWALL AND VPN APPLIANCES

**FIREBOX® 4500**

**FIREBOX® 2500**

**FIREBOX® 1000**

**FIREBOX® 700**

TARGET CUSTOMER	Central Office and VPN Hubs High Performance, scalable firewall and VPN appliance for central offices and VPN hubs requiring strong security and large volume of wirespeed VPNs.	Medium-Size and Web Business Powerful, high performance firewall and VPN security appliance for medium-size businesses with high volumes of Web and e-commerce traffic.	Mid-Size Business or Branch Office Comprehensive, easily managed firewall and VPN security appliance for mid-size businesses or branch offices requiring secure, private networks.	Smaller Business or Remote Office Price/performance leading firewall and VPN security appliance for small businesses and remote offices requiring an easy to manage firewall.
SPECIFICATIONS				
Manufacturer Part No.	WG34500	WG32500	WG31000	WG30700
Packet Filter Throughput	200 Mbps	200 Mbps	200 Mbps	150 Mbps
3DES VPN Throughput	100 Mbps	75 Mbps	60 Mbps	5 Mbps
Total VPN Tunnels	3000	2000	1300	150
Authenticated Users	5000	5000	1000	250
User License	Unlimited	Unlimited	Unlimited	Unlimited
Mobile User VPN	50 Licenses Included	50 Licenses Included	50 Licenses Included	Upgrades Available
VPN Manager	4-Node License	4-Node License	4-Node License	n/a
Ethernet Interfaces	3 RJ-45 10/100TX	3 RJ-45 10/100TX	3 RJ-45 10/100TX	3 RJ-45 10/100TX
Hardware Warranty	1 Year	1 Year	1 Year	1 Year
FEATURES AND BENEFITS	F E A T U R E S		B E N E F I T S	
	Packet Filter Firewall	<ul style="list-style-type: none"> <li>Protects all networked computers with dynamic stateful packet filter firewall technology.</li> </ul>		
	Security Proxies	<ul style="list-style-type: none"> <li>Additional layer of protection that examines network traffic at the application layer before it enters or leaves the network, and strips dangerous attachments.</li> <li>WatchGuard Firebox proxies protect the functions most common to business use of the Internet: SMTP, FTP, HTTP, and DNS.</li> </ul>		
	Monitoring, Reporting, and Logging	<ul style="list-style-type: none"> <li>Provides secure encrypted colorized logging, historical reporting, and real-time monitoring that make security management more effective and allow network administrators to scrutinize network traffic based on a wide range of criteria.</li> </ul>		
	Mobile User VPN	<ul style="list-style-type: none"> <li>Allows remote users secure access to corporate resources, increasing employee productivity and telecommuting opportunities.</li> <li>50 User License included with purchase of Firebox 4500, 2500, and 1000 (license upgrades available).</li> </ul>		
	Branch Office VPN	<ul style="list-style-type: none"> <li>Allows encrypted VPN tunnels between offices with a Firebox or other IPsec compliant device.</li> <li>Improves communication and data sharing, and reduces overall business expenses.</li> </ul>		
	Network Address Translation (NAT)	<ul style="list-style-type: none"> <li>Provides an additional level of network protection by hiding internal IP addresses and allowing internal servers to function as Internet-accessible servers.</li> <li>Supports static, dynamic, and 1 to 1 NAT.</li> </ul>		
	Authentication	<ul style="list-style-type: none"> <li>Enforces access policies based on users or groups.</li> <li>Firewall Authentication (NT, Radius, SecurID, CRYPTOCard, or Firebox authentication server).</li> <li>VPN Authentication (NT, Radius, PKI, or Firebox authentication server).</li> </ul>		
	Web Content Filtering	<ul style="list-style-type: none"> <li>Restricts web use by user, group, time of day, or site type via a regularly updated database.</li> <li>Improves network administrators' web management programs and employee productivity.</li> </ul>		
	LiveSecurity® Service	<ul style="list-style-type: none"> <li>Provides software updates, security-related editorials, and technical support.</li> <li>An initial 1-year LiveSecurity Service subscription is included.</li> </ul>		
	Predefined Services	<ul style="list-style-type: none"> <li>Predefined services simplify network security management (e.g., scan and spoof detection, port and site blocking, synflood protection, DHCP, and PPPoE support).</li> </ul>		
	McAfee® VirusScan® ASaP	<ul style="list-style-type: none"> <li>Delivers continuous protection against known viruses, Web attacks, and e-mail intrusions to desktop environments and infrastructures.</li> <li>5 User License included (license upgrades available).</li> </ul>		
	VPN Manager	<ul style="list-style-type: none"> <li>Creates VPN tunnels between central and branch offices in three easy steps, reducing the complexity of multi-site and remote user VPN management.</li> <li>A VPN Manager 4-node license is included with the Firebox 4500, 2500, and 1000 (license upgrades are available; N/A with Firebox 700).</li> </ul>		
	High Availability Option	<ul style="list-style-type: none"> <li>Allows a second standby Firebox (primary and standby must be same model) for failover protection.</li> <li>Increases network uptime and ensures consistent network security.</li> </ul>

## FIREBOX® III FIREWALL AND VPN APPLIANCES

<b>PRODUCT HIGHLIGHTS</b>			
	<ul style="list-style-type: none"> <li>▪ Great Value Richest security features in the SME market, including firewall protection with application proxies.</li> <li>▪ Easy to Deploy Rapid installation with QuickSetup Wizard and intuitive management interface.</li> <li>▪ Simplified Administration Drag-and-drop VPN creation, real-time monitoring, and traffic trend analysis.</li> <li>▪ Certified Technology ICSA compliant firewall and IPSec VPN technology.</li> </ul>		
<b>UPGRADES AND OPTIONS</b>			
	<ul style="list-style-type: none"> <li>▪ Mobile User VPN - 5 User WG3606</li> <li>▪ Mobile User VPN - 20 User WG3508</li> <li>▪ Mobile User VPN - 50 User WG3611</li> <li>▪ High Availability WG3900</li> <li>▪ 1 Yr LiveSecurity Renewal (part# varies by product)</li> <li>▪ 2 Yr LiveSecurity Renewal (part# varies by product)</li> <li>▪ LiveSecurity Gold Upgrade (part# varies by product)</li> <li>▪ SpamScreen WG3700</li> <li>▪ McAfee® Anti-Virus - 10 User License WG7573</li> <li>▪ McAfee® Anti-Virus - 50 User License WG7574</li> <li>▪ ServerLock® for NT/2000 WG4810</li> <li>▪ AppLock®/Web for IIS Servers WG4830</li> <li>▪ Extended Hardware Warranty-1 year Express (part# varies by product)</li> </ul>		
<b>FAQ</b>			
<b>Q:</b> What technology does the Firebox III use to protect my network?	<b>A:</b> The Firebox III appliances use a combination of stateful dynamic packet filtering and application proxies to protect your network. Stateful dynamic packet filtering, more effective than traditional packet filtering, allows rules to be built dynamically depending on the conditions of the connection. WatchGuard application proxies apply a secondary set of rules to the application data layer of a TCP/IP packet for greater security from known threats associated with applications such as SMTP, HTTP, DNS, and FTP.		
<b>Q:</b> Do the Firebox III appliances support VPN?	<b>A:</b> Yes. Firebox appliances function as both firewall and VPN appliances and supports standards-based IPSec branch office and remote user VPN tunnels.		
<b>Q:</b> Can a VPN tunnel be set up between a Firebox III and a Firebox SOHO 6tc?	<b>A:</b> Yes. The Firebox III appliances support branch office VPN tunnels with Firebox SOHO 6tc appliances.		
<b>Q:</b> Is the cost of a Firebox III based on the number of users it supports?	<b>A:</b> No. Firebox III appliances are not licensed by the number of users. Each Firebox supports virtually an unlimited number of users. Different Firebox models are available for different size offices to ensure that each office is able to select the appliance that best meets their business and network performance needs.		
<b>Q:</b> Will Firebox III models work with any Internet connection?	<b>A:</b> Firebox III models support T3, T1, ISDN, DSL and cable modem Internet connections. The Firebox III appliances support dynamically assigned addresses on the external interface.		
<b>Q:</b> How many Ethernet interfaces do the Firebox III appliances support?	<b>A:</b> Each Firebox III model supports three auto-sensing RJ-45 10/100Tx Ethernet interfaces, referred to as Trusted, External, and Optional.		
<b>Q:</b> What are the logging and notification capabilities of the Firebox III appliances?	<b>A:</b> The Firebox System supports multiple levels of logging and notification. Logged events can be configured to invoke notification via e-mail, pager, or custom program. Syslog-style logging is available through the user interface.		
<b>Q:</b> Do the Firebox III appliances generate reports about network activity?	<b>A:</b> Yes. A flexible HTML-based Historical Reporting tool with an array of custom and standardized reporting options lets you schedule the run times for your reports and/or export files to an application such as WebTrends for further analysis.
